Partnership with East Windsor on Police Radio Project

Town staff has continued conversations with the Town of East Windsor regarding a cooperative effort on a public safety radio communication system. East Windsor would like to utilize three of the privately owned communications towers that are located at Town of Windsor

facilities. This effort coincides with our need to upgrade our radio system software and some of the town owned equipment at each of the tower facilities. The State of CT has approved funds toward this project. Staff is currently discussing possible terms for an inter-local agreement with East Windsor. There is a potential a proposed agreement will be presented to the Council in June for consideration. We will provide further information later this month as discussions and planning proceed.
